

JULY 9 – 13
2017

INDIANAPOLIS

THE HYATT LODGE AT MCDONALD'S CAMPUS
2815 JORIE BOULEVARD • OAK BROOK, IL 60523

The 13th International Conference on Tetrapyrrole Photoreceptors of Photosynthetic Organisms (ICTPPO2017) invites both established and aspiring young scientists to the beautiful city of Chicago to discuss recent research and technology advances as well as next challenges in the field of tetrapyrrole photoreceptors. The main topics range from the structures, dynamics and diverse functions of photoreceptors to synthesis, metabolism and catabolism of tetrapyrrole pigments. The scientific sessions will also address how tetrapyrrole-based systems are regulated and integrated at the organismic level; and how they can be exploited, repurposed and engineered for biomedical and renewable energy applications.
